Gain insights into the latest trends, data analytics, pharmacy intelligence and automation to improve profitability by optimising business operations and maximising income opportunities.

Hear from industry leaders on:

- The latest technology to **optimise inventory management**
- **How data insights can engage patients and customers** by improving communication and providing better recommendations on services and products
- **Best practice methodologies applied by local and international retailers** on data utilisation, merchandising and pricing to create meaningful and profitable customer engagement
- How to **optimise the financial health and performance** of your pharmacy

Join us for an evening of networking, dining and insights from industry leaders. This exclusive event brings together pharmacists to share ideas, discuss trends, and create meaningful connections.

Whether you are a new pharmacy owner or own multiple pharmacies, this event is the perfect opportunity to expand your knowledge, build your network, gain inspiration and realise the vision for your pharmacy.

Pharmacist Networking Dinners are for invited guests only.
